

god is dead

Glaive

You can say what you like I've heard it all before
Why don't you take what's mine
Because everything I have is yours
And why don't we break bread
And break out the wine of course
Cause the pain I had
Has finally run its course

God is dead and everyone's leaving
And I just can't believe I didn't see it
This little plight or mine will you ease it
This little plight of mine will you ease it

God is dead and everyone's leaving
And I just can't believe I didn't see it
This little plight or mine would you ease it
This little plight of mine would you ease it

Would you ease it?
Oh would you ease it

Oh would you ease it

And it stops and it starts
And it bleeds and it hurts
Put my head in my hands
At eternities gate
It's just not worth the attention
And I'm fine going to hell
As long as my dogs go to heaven
And I'm working on accepting all my flaws
What would Jesus do?
There's blood on both my palms
There's blood on both my palms
There's blood on both my

God is dead and everyone's leaving
And I just can't believe I didn't see it
This little plight or mine would you ease it
This little plight of mine would you ease it

God is dead and everyone's leaving
And I just can't believe I didn't see it
This little plight or mine would you ease it
This little plight of mine would you ease it
