

I know  
You kept it dark, my light was fading  
I know  
The voice I heard was all misleading  
You took what you need from a place of me  
You think I can't see but I know  
You're sick, you're sick, yeah you're sick  
Toxic

What do you think you know about me?  
I've felt it before but it never cut so deep  
I took the blame, you took the shame

I know  
You kept it dark, my light was fading  
I know  
The voice I heard was all misleading  
You took what you need from a place of me  
You think I can't see but I know  
You're sick, you're sick, yeah you're sick  
Toxic

How many times before I break down?  
Am I fooling myself? 'Cause I've been here before

I took the blame, you took the shame  
I felt the pain, I'm not the same

I know  
You kept it dark, my light was fading  
I know  
The voice I heard was all misleading  
You took what you need from a place of me  
You think I can't see but I know  
You're sick, you're sick, yeah you're sick  
Toxic

Toxic  
You took what you need from a place of me  
You think I can't see but I know  
You're sick, you're sick, yeah you're sick  
Toxic
