

Godspeed

Glasvegas

We are two cats 18 lives down the line
A nut job bananas stark raving mad item
Forever I've been saying "I need space, freedom and alone time"
For centuries and days I felt like the footnote
In your design

Together we lived, together we died
Hey hey, my my
Together we lived, together we died
Is this goodbye?

Looking back, maybe we only connected on a map
Looking closely, even then there was always a gap
So take this parting gift of both my index and middle finger
Maybe this is gonna hurt more than I figure
More than I figure

Together we lived, together we died
Hey hey, my my
Together we lived, together we died
Is this goodbye?
Together we lived, together we died
Hey hey, my my
Together we lived, together we died
England, is this goodbye?

Godspeed, love
Godspeed, love
Godspeed, love
Godspeed, love
