

I Was Just Thinking About You

Glen Campbell

I was just thinking about you
Dialed your number
And heard the phone just ring and ring
Made me wonder, how does anything stay the same?
It was just raining, and I was just thinking about you

I was just thinking about you
Here by the ocean
Watching the sun just come and go
Made me wonder, how does anything stay the same?
It was just raining, and I was just thinking about you

I see your face on total strangers
I turn my head each time I hear your name
I was just thinking about you
Watching that old movie
You know, the one you love so well

Made me wonder, how does anything stay the same?
It was just raining, and I was just thinking about you
It was just raining, and I was just thinking about you
