

Hurts So Bad

Glenn Fredly

How could you hurts somebody
When you said that you need me so
How could you leave somebody
When you said that you love me so

First time you said that I was yours
You change my life around
Loving you is like living in heaven
But the day when you broke my heart

I felt from up above
You told me how sorry you were
I still find lies in your eyes

How could you hurts somebody
When you said that you need me so
How could you leave somebody
When you said that you love me so

I though you were my angel
I never fell so deceive, baby
You knowing that's not change anything
But I do still want you, baby

It's like long road that never end within I still remain
But ain't goin' nowhere it goin' nowhere even it hurts so bad

How could you hurts somebody
When you said that you need me so
How could you leave somebody
When you said that you love me so

Sure I stay sure I go
Cause I'm givin' all to you
Hooo, please somebody tell me what I'm supposed to do

How could you hurts somebody
When you said that you need me so
How could you leave somebody
When you said that you love me so

How could you hurts somebody
When you said that you need me so
How could you leave somebody
When you said that you love me so

How could you leave somebody
When you said that you love me so
