

Jenga

Glenn Travis

Let's talk about something real
Every day I'm in fear
'Cause I don't wanna fail
I don't wanna be stuck here running through these tireless
I already know your side of this
Different from mine, but a crime

Got all the fences, and you break through all my walls
And I won't forget that, you were there when I was down
You right, we both played our cards right, in a lost fight
Trying to win
And now we're back to

Who's move is it
Is it your move
Is it my move
I'm asking now
Who's move is it
If you trust me
Can I trust you

'Cause one of us won't back down, won't back down (won't back down, won't back down)
Won't back down, won't back down (won't back down, won't back down)
So with one more thing your strong now
Then we'll just both go down, both go down (both go down)
Nah not one of us won't back down, won't back down (won't back down, won't back down)
Won't back down, won't back down (won't back down, won't back down)
So with one more thing your strong now
Then we'll just both go down, both go down (both go down, both go down)

It's the same sequence
I know you love to get even, ready for war but
It'll have to be this way
That you have been down
You don't have to be the same
I know you miss the way that I

Climb all the fences, and you break through all my walls
And I won't forget that, you were there when I was down
You right, we both played our cards right, in a lost fight
Trying to win
And now we're back to

Who's move is it
Is it your move
Is it my move
I'm asking now
Who's move is it
If you trust me
Can I trust you

'Cause one of us won't back down, won't back down (won't back down, won't back down)
Won't back down, won't back down (won't back down, won't back down)
So with one more thing your strong now

Then we'll just both go down, both go down (both go down)
Nah not one of us won't back down, won't back down (won't back down, won't back down)
Won't back down, won't back down (won't back down, won't back down)
So with one more thing your strong now
Then we'll just both go down, both go down (both go down, both go down)
