

Let It Rain

Gloria Gaynor

It's in your eyes,
You want to cry
But you're afraid to let go
Sometime the past
Comes rushing back
Emotions overflow

You don't have to worry,
You know I'll understand
I want to help you through it,
Anyway I can
I'm gonna be here for you,
Take me by my hand
Break through these skies of gray,
Don't hold back

Let it rain
Let your teardrops wash away the pain
By your side I promise to remain
My love will pour like sunshine
Through the rain
Let it rain

With every touch,
I'll learn your trust
You'll see my love is for real
So let me in,
I'll show you how to love again
Don't have to hide how you feel

I'll be here to hold you,
Hold you when you cry
With my tenderness,
I'll push the clouds aside
We'll make tonight the night,
You leave it all behind
Break through these skies of gray,
Don't look back

Let it rain
Let your teardrops wash away the pain
By your side I promise to remain
My love will pour like sunshine
Through the rain
Let it rain

You'll see a brighter day
Let my love lead the way
To a rainbow in the sky
Tears of joy will fill your eyes
Let it rain

Let it rain
Let your teardrops wash away the pain
By your side I promise to remain
My love will pour like sunshine
Through the rain

Let it rain.
