

For Victory

Gloryful

Starting our march
To enter the final fight
A long way through fear
With uncertainty we ride
Side by side, the silent anguish an enemy
Until morning light
We'll call us the free

The night is quiet
The stars shine bright
Black wings that guide us
Will save us tonight

When duty calls
Draw the sword, get ready to strike
The road to glory, our destiny
Unleash the steel
For victory

Brothers, can you feel it?
It's in the earth, it's in the air
Rushing through our veins
While our blood is running hot
Side by side
We raise our fists up in the air
Try to stop us if you fucking dare

Like an avalanche of steel
Followed by our battlecries
Deadly arrows through the sky
Keep firing till the morning dies
Loyal to the king and crown
Our enemies will all fall down
Seize your destiny
Unleash the steel
For victory
