# Be Here Now

**Gnash**

So I've been thinking about dying
And everything that means
I was driving home on the PCH
When I heard my telephone ring
They said he was gone
He was a hero of our time
And I couldn't help but wonder
What they'd say about me when it's mine

And it hit me like a damn grand piano
Falling from a 4 story flat
That maybe everybody dies
And everybody don't come back
And though I'd like to make a difference
Before I blink out of existence
I know everything will change and that's a fact
So tonight show me how to be here now

So I've been thinking about outer space
Maybe we should move there
Get as far away from LA
From the traffic jams and the polluted air
And I've been thinking about flying
And how this plane can just go down
That nothing really matters
If everything ended right now

Then it hit me like a damn grand piano
Falling from a 4 story flat
That maybe everybody dies
And when they do, they don't come back
And though I'd like to make a difference
Before I blink out of existence
I don't wanna live my life afraid of that
So tonight show me how to be here now

So tonight show me how to be here now
Oh tonight show me how to be here now
Yeah tonight show me how to be here now
