

# With You

Go-Go

Sunrise in the morning  
As pretty as you next to me  
As we camp out in the forest  
And layed beneath the stars and trees  
Nothing really mattered  
Living in our wildest dreams  
To the sunset in the evening  
Creating perfect fantasies

Let's take polaroids and drive older cars  
Fuck hotels! Let's camp up  
Underneath the stars  
Paint memories on a canvas  
Sing songs on our guitars  
Look for either any place on the Atlas  
I'll take on the world with you  
I'll take on the world with you, I-I  
I'll take on the world with you

With the wind just take me  
Pull me very far away  
As we disconnected from the city  
Where the lights move for the stars to play  
As long as it's just you with me  
My heart feels in a safer place  
As we're painting all these memories  
With colours that won't fade away  
With colours that won't fade away  
With colours that won't fade away

Let's take polaroids and drive older cars  
Fuck hotels! Let's camp up  
Underneath the stars

Paint memories on the canvas  
Sing songs on our guitars  
Look for either any place on the Atlas  
I'll take on the world with you  
I'll take on the world with you, I-I  
I'll will take on the world with you

(Safe and sound boy, don't look back now)  
We'll keep running through the dark of night  
I've got you safe and sound, boy  
Don't look back now  
We'll keep running through the dark of night  
I've got you safe and sound, boy  
Don't look back now

I'll take on the world with you (ohh with you) I-I  
I'll take on the world with you  
I'll take on the world with you
