

Stay

Goapele

Since the day I saw you babe
Distractions on a daily basis
All that's running through my mind is your face
You know I don't just easily believe
Since all I'll ever need is turn the lock
You've always had the key

So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me
So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me

The world outside is a tempting place
It can't compare or can't replace
What we have is something so unique
And life will throw us crazy things
But my love stands here and still remains
If I lost it all you're the only thing I need

So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me
So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me

Baby, I'm yours
You belong with me
Baby, I'm yours
Baby you're mine

I've given you my everything
(Baby you ain't seen the rest of me)
(Baby give it to me don't stop)
And I don't want to rush a thing
And I ain't gonna run away
'Cause in these moments there is no one else around

So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me
So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me
So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me
So won't you just stay a little longer?
Love a little stronger
Right here is where you belong with me

Said I'm gonna stay right here
With me, with me, with me, with me
You belong with me
With me

I get high sometimes
Know that you're all mine
No, no
