

Echoes falling through my head now
Weeks go changing into months
What the hell is going down?
Watch it all come spilling out

Out
Out
Out
Out

Colours showing all your flaws
The answer's knocking on the door
You are never to be found
Patience, where is your heart now?

Where is your heart?
Where is your heart?
Where is your heart?
Where is your heart?

We're out here, we're tryna find it
We're out here, we're tryna find your heart
We're out here, we're tryna find it
We're out here, we're tryna find your heart
We're out here, we're tryna find it
We're out here, we're tryna find your heart
We're out here, we're tryna find it
We're out here, we're tryna find your heart

Find your heart
Find your heart
