

# Weight of a Soulless Heart

Goatwhore

A silent flame burns in a cold black heart  
Temptation's rapture  
Grasp of the esoteric  
Existence is epidemic

Unconscious mental thrall  
Revelations through trance  
Screaming into black  
Dissolved boundaries  
Vast graves unearthed  
Manifest into death

Take the life from this flesh  
Paths of no return  
Welcome the nativity of decay  
Entry of the lifeless  
Ascension of darkness

Voices of the dead  
Submit to their bidding  
Detach the body from the soul

Descending spirit tainted in flaw  
The weight of truth  
Trial of the heart  
Faithless embrace sealed in pain  
Sentient bliss devoured by chaos

Reborn through the current of Saturn's breath  
Opening the portal to a resurrection of fate  
Vortex incarnate  
Reaching out to me  
Reaching out to me

Silence within twilight's dawn poisoning the senses  
Coiled in the depths of decay  
Manifest this essence  
Deathlike existence

Unearthly release into the void beyond  
Peer into abysmal eyes  
Greeting this forbidden dawn

Cast into nothingness  
Sinful devotion  
In a cold black heart
