

Devil's Night

God Module

Let's leave this for another time
Another nameless faceless crime
A way to release this violence
Burning building breaking inside me

I'd like to tell you that we'll be fine
I'd love to lie and ease your mind
But every time I close my eyes
I see you helpless, bleeding all over me

So let's dance like we're dead
With our imaginary friends
Who have no heads
Take turns digging our graves tonight
Under the moon in the dark
As the fires burn bright

We can lie with every word that we say
Take off the faces that we wear in the day
Cut out the sun kill the lights cause
In the dark you're beautiful to me

Destroy everything in sight
Burn this fucker down on Devil's Night
Tomorrow is All Hallows Eve
But tonight you're wearing this mask for me

So let's dance like we're dead
With our imaginary friends
Who have no heads
Take turns digging our graves tonight
Under the moon in the dark
As the fires burn bright

Let's dance while we tear it all down
Wake up the dead
While they rot in the ground
Take turns slitting our wrists tonight
Under the moon in the dark
This feels so right
