

## Ever After

### God Module

How can you not believe - In your hold over me?  
Look into my eyes - You are my everything  
As close as I'll get to heaven - Existing here on earth  
You control my reactions and justify my birth

Frozen tears are hard to cry  
But they will still melt over time  
And so do our fears  
Happily everafter

Let's pretend were not alive  
Make believe we already died  
So we can stay like this  
And live happily everafter

Love has lost its mind - Forever we are entwined  
Without you I can't breathe - Without you I'm not me  
As close to the touch of an angel - That I will ever feel  
Sometimes it's hard to believe that you are real
