

# Undone

## God Module

Tell me all the secrets  
That you think I don't already know  
Take me back to the place  
Where our footprints  
Bleed into the snow  
Separate your sex from everything  
Recreate the nightmares that make you come  
To understand nothing is possible  
To comprehend  
That the world has come undone

In your head  
By my hands  
The world has come undone

Come with me I'll show you the things  
You won't admit that you really want to see  
On your knees we'll crawl together  
Through the doors to depravity  
Separate your sex from everything  
Recreate the nightmares that make you cum  
To understand that nothing is possible  
To comprehend  
That the world  
Has come  
Undone
