

# Over And Above My Head

Godley & Creme

(Mmm...)

You may not understand, girl  
These words that I say  
But they're only second-hand, girl  
They're true anyway

They say at the top of the world  
We know it's for real  
This feeling we feel

But it's over and above my head  
It's over and above my head

You heard them before, girl  
You'll hear them again  
There's no reason or rhyme, girl  
It's the same at both ends

They say at the top of the world  
We know it's for real  
This feeling we feel

But it's over and above my head  
Over and above my head  
Over and above my head

Need I say more, girl  
Than I've already said  
If you don't know by now, girl (no, no)  
Then what's living is dead

They say at the top of the world  
The end is beginning  
To end all the pain

And it's over and above my head  
Over and above my head  
Over and above my head

Over and above my head  
(You gotta hear me say it)  
Over and above my head  
(Whoa)
