Toxic Garbage Island

Gojira

Mysterious form, soul in the dark Under this heavy sealing concrete waves Followed by servants, funeral cortège This pale ghost is gathering his strength

Ghost, pale, the procession is crawling

Plastic form dead things, it is now so clear How could I fail to understand Cities are burning, the trees are dying My heart awake but still Pain is killing me, pain is killing me

Take this pestilent destruction out of my way
The great pacific garbage patch is exhausted
And the world is sliding away in a vortex of floating refuse
With the sacred one you have lost

Plastic bag in the sea Plastic bag in the sea Plastic bag in the sea Plastic bag in the sea
