

## Until You Came Along

Golden Smog

Sometimes you're up, sometimes you're down  
Don't let your feet ever touch this ground  
Comfort me in times of doubt  
In deep despair, lies and cares and a falling out  
With my friends I used to follow  
Nearly everybody's daughter  
That's until you came along  
In a bar-room patrons singing  
But I just sat there drinking  
That's until you came along  
Your star-crossed eyes and your troubled mind  
Seems you were left just for me to find  
Sweet lady lay your hands in mine  
Upon my face laid to waste by years of wine  
With my friends I used to follow  
Nearly everybody's daughter  
That's until you came along  
In a bar-room patrons singing  
But I just sat there drinking  
That's until you came along  
Sweet lady lay your hands in mine  
Upon my face laid to waste by years of wine  
With my friends I used to follow  
Nearly everybody's daughter  
That's until you came along  
In a bar-room patrons singing  
But I just sat there drinking  
That's until you came along  
With my friends I used to follow  
Nearly everybody's daughter  
That's until you came along  
But the darkness just got darker  
This heart of mine got harder  
That's until you came along
