

## Perfect

Goldfinger

I'm coming home, off the road  
It's been a long, long year  
I don't know where I've been  
But I need you here  
I miss the daylight  
I miss the sunshine  
Everywhere I go  
Everything I've seen  
I wake up in the night  
As darkness follows me  
So light another campfire  
Sleepin' like a vampire  
I don't wanna wait  
For this day to end  
I just wanna lay  
With you in bed  
Where everything is perfect  
You know how to save me  
Everything is right  
When I'm with you  
You always find a way  
To make it through  
Everything is perfect  
You know how to save me  
Making out, flying high  
Hope we don't come down  
Close my eyes and I'm there  
In this life we found  
I feel it too much  
Then I feel my heart crush

Anytime that I've  
Been away too long  
No matter what the reason  
It still feels a little wrong  
But every time they see you  
Everything is brand new  
I don't wanna wait  
For this day to end  
I just wanna lay  
With you in bed  
Where everything is perfect  
You know how to save me  
Everything is right  
When I'm with you  
You always find a way  
To make it through  
Everything is perfect  
You know how to save me  
I don't wanna wait  
For this day to end  
I just wanna lay  
With you in bed  
Where everything is perfect  
You know how to save me  
Everything is right  
When I'm with you

You always find a way  
To make it through  
Everything is perfect  
You know how to save me
