

Never Settle

goldford

Every hundred years they line up.
We stare up at the moon, they guide us
And how are we to prove that its for us

I was in my room face down
Feeling so confused by this town
And what was I to do but break down

Certain planets when they rise, call attention to disguises
Compliment don't compromise
Feel it right between your eyes

You should never ever settle for it
You should never ever settle for it
You should never ever settle for it, oh

You should never ever settle for
Never run into a burning forest
You should never ever settle for it, oh

Every hundred years they shine here
And everything you want becomes clear
And suddenly you know how to get there

I was in my room lights out
Dreaming how the story plays out
Knowing that it started right now

Certain planets when they rise, call attention to disguises
Compliment don't compromise
Feel it right between your eyes
And you were there you felt it too, it did something new to you
Tie your laces speak the truth, speak the truth, speak the truth

You should never ever settle for it
You should never ever settle for it
You should never ever settle for it, oh

You should never ever settle for
Never run into a burning forest
You should never ever settle for it, oh

Certain planets when they rise, call attention to disguises
Compliment don't compromise
Feel it right between your eyes
And you were there you felt it too, it did something new to you
Tie your laces speak the truth, purple faces, broken rules

You should never ever settle for it
You should never ever settle for it
You should never ever settle for it, oh

You should never ever settle for
Never run into a burning forest
You should never ever settle for it, oh
