

Upside Down

goldford

Sometimes I need a light when the moon is low
Sometimes I need some loving when my feelings show
Although I never found a way to let you know
I also never found a way to let you go
And now I see that look shining on your face
Your smile is warming up just like a sunny place
My worries disappear and all my fears erase
You're my happy place
When do we ever know dear what's in front of us,
Til we're looking back here and we see the dust
I know you lift me up when I am feeling rough,
Right now I'm feeling rough

So where can you be
You're the only upside down
Baby let your sunshine down
On Me
You know me from the inside out
You're the only upside down

I lean into your kiss for my sanity
So give me all your lovin for my vanity
The phone is gonna ring and we'll just let it be,
come settle in with me
Do we ever know dear what's in front of us,
Til we're looking back here and we see the dust
I know you lift me up when I am feeling rough,
Right now I'm feeling low

So where can you be
You're the only upside down
So baby let your sunshine down
On Me
You know me from the inside out
You're the only upside down

It only takes the two of us
To clean this mess in front of us
And beam like lights that break the dusk
Here and now is just enough
For me to believe

You're the only upside now
Baby let your sunshine down
I'm free
You know me from the inside out
You're the only upside down
