

# Crystalline Green

Goldfrapp

Here we come, driving down  
Deep and wide, settle down  
On the beach, get the sun  
Coming down, get and warm

Turn it down, settle down  
On the beach, get the sun  
On the down, jealous day  
You can lounge, turn it down

I wanna waste it playing  
Spend all our day in a dream  
Crystalline green watch it rolling  
Feeling the weight of the sun

Here we come, driving down  
Deep and wide, blue and green  
Breathing in, come alive  
Here we come, with the stars

Letting slip in through my fingers  
Little rings float in your eyes  
Try forget who are you now  
Stare into space, watch the sky
