I never thought I would return
To be consumed by you again
Think you're cured
You'd see it come
The folly of a monster love like you

Grey is good
The light is good
We went down to Hollywood
You only get one chance in Tinsel Town

I save the part The sweetest part Shook for you

Everything comes around Bringing us back again Here is when we start And where we end

I never thought I would return
To be consumed by you again
But I know a papermoon
The folly of a monster love like you

The pavement smell just after rain
The sun leaps out, it's clear again
I told you how I felt the earth could move
The folly of a monster love like you

Everything comes around Bringing us back again Here is when we start And where we end

Everything comes around Bringing us back again Here is when we start And where we end...
