

Space And Time

GOLDN

Yeah

The sex, the drugs, the highs with you
The things that I would miss the most is movies every night with you
You can change the altitude
The traffic on the 405 somehow don't seem as bad with you

There's a different ending to the story that we wrote
Can you remember how it goes?
The only thing that haunts you more than living with a ghost
Is losing what you love the most
You know I'd ride
Through the hills and the valleys, past the mansions and alleys
We'd touch the sky
Until gravity found me and you flew on without me

Well, we'll always have that place and time
Through space and time
We'll always have that place and time
Well, we'll always have that place and time
Through space and time
We'll always have that place and time
(Through space and time)

Said this is not goodbye, I go back to us all the time
I take a hit, it's like I'm right there by your side
Time cannot erase us, can't replace us, can't retrace
But we can try

There's a different ending to the story that we wrote
Can you remember how it goes?
The only thing that haunts you more than living with a ghost
Is losing what you love the most
You know I'd ride
Through the hills and the valleys, past the mansions and alleys
We'd touch the sky
Until gravity found me and you flew on without me

Well, we'll always have that place and time
Through space and time
We'll always have that place and time
Well, we'll always have that place and time
Through space and time
We'll always have that place and time
(Through space and time)
