

# Hot Flash

Gomey

Took one from your palm  
You said this would heal my pain  
(Oh baby I) Never tried before  
Got me numb like novocaine  
Now you sayin' wait  
The phases take a little  
Change the pace  
Cause now I got a taste  
I can't let it go to waste  
Feel like jumping through the flames

I've been on a roll  
For far too long  
Now your (Ah)  
Is my favorite song

Laced and cut  
Had me falling in love  
Got your touch  
Hot flashes and withdrawals  
Stains from lipstick on the pillow when you bite it like that  
Fit inside you perfect finally found the right match  
Oh, tomorrow we're paying the cost  
With hot flashes and withdrawals

You put one more on my tongue  
I bend you over the bedside  
Downstairs they hear us right through the floor  
Dilated eyes can't focus, frozen  
Lost between your hips, hypnosis  
Everywhere you touch is sensory overload

I've been on a roll  
For far too long  
Now your (Ah)  
Is my favorite song

Laced and cut  
Had me falling in love  
Got your touch  
Hot flashes and withdrawals  
Stains from lipstick on the pillow when you bite it like that  
Fit inside you perfect finally found the right match  
Oh, tomorrow we're paying the cost  
With hot flashes and withdrawals
