

Day light take me
No control
No control

Wind blows
We go
Shadows

Sitting with you day into the night long
Silence makes the moment hold its time gone

Shame loss blame numbness
Make the heart grow cold

Wind blows
Shadows

Sitting with you day into the night long
Silence makes the moment hold its time gone

I understand you
What you have learned from me
The secret of sound
I give you
The secret to breathe

Sitting with you day into the night long
Silence makes the moment hold its time gone

Strength of this will always make your eyes blind
The sun is setting so we'll make it right
