

# Souls in the Machine

Goo Goo Dolls

All this time I was losing control  
Chasing a life that would steal my soul  
Too many faces, too many lies  
Too many hands trying to steal this prize  
We all got demons  
We all get scared  
On our knees hoping someone cares

And all we need is a little honesty right now  
We're still waiting

We are, we are, we are the soul in the machine  
We are, we are  
When you look up at the bright stars  
We are apart of everything  
We are, we are

Every breath's a moment  
Every moment is a chance to live again

This hope is burning like fire in my veins  
When the fear is gone and the truth remains  
People are gusts  
We've got so much to give, yeah  
So many dreams  
So much to live for

When life gets hard, we get brave  
We all get scared, it's okay

We are, we are, we are the soul in the machine  
We are, we are  
When you look up at the bright stars  
We are apart of everything  
We are, we are

Every breath's a moment  
Every moment is a chance to live again

When you hear it coming  
Oh it feels like falling  
When you find your calling  
Don't be afraid darling  
I know you'll always be brave  
When you hear it coming  
Oh it feels like falling  
When you find your calling  
Don't be afraid darling  
I know you'll always be brave  
Can you hear it calling?  
Oh it feels like falling  
And then you find your calling  
Don't be afraid  
Darling be brave
