

# Orbit

Good Kid

I've been, I've been thinking that  
I can't quite get enough time  
On the inside of the cycle that you spin with  
Gravity and dust, I've fallen in between the planets and the sun

Into the orbit that surrounds you  
That orbit that's around you  
That orbit that surrounds you  
That orbit that's around you

Now the space is filling up  
Satellites that I can't seem to keep track of  
I get the feeling I'm not quite made of the right stuff  
To float between the rings of cosmic metal love

Into the orbit that surrounds you  
That orbit that's around you  
That orbit that surrounds you  
That orbit that's around you

T-minus five, four, three, two, one  
Ignition sequence

That orbit that surrounds you (That orbit that surrounds)  
That orbit that's around you (That orbit that's around)  
That orbit that surround you  
That orbit that's around you
