

## Part of Me

Good Old War

We've got to run  
If you're holding on the seams will come undone  
And you'll only get part of me  
We don't want to catch a break while we're playing it safe  
You'll only get part of me

But I'm always looking forward for an open door  
I found an outlet for all my feelings  
They're trying to cut the cord

I'm thinking we've got to run  
If you're holding on the seams will come undone  
And you'll only get part of me  
We don't want to catch a break while we're playing it safe  
You'll only get part of me

But there's always a place for you here in my wild heart  
I dream of you on a highway under a thousand stars  
We can have it all  
Just like we're dreaming  
We can have it all  
I can make it on my own

We've got to run  
If you're holding on the seams will come undone  
And you'll only get part of me  
We don't want to catch a break while we're playing it safe  
You'll only get part of me

And you can have it all  
Just like we're dreaming
