You Should Know

Good Old War

Me and my friends
Move around really slow
We're playing the game
Like we got nowhere to go
We know it though

And when it comes
To the end of the day
We wonder where it went
Me and my friends
We got nowhere to go

You should know the time will come
And it goes by fast
And when you think we have forever
You should know that
This will soon be the past
This will soon be the past

Do you ever think
When you ever look around
The sky is a bulb
That someone turned upside down
To keep us in

Sometimes you want
To try and escape
But worry it's not safe
Do you ever think
The sky is turned upside down

You should know the time will come
And it goes by fast
And when you think we have forever
You should know that
This will soon be the past
This will soon be the past

When we're all done
What will we want them
To say about us
That tells 'em that we were here

You should know the time will come
And it goes by fast
And when you think we have forever
You should know that
This will soon be the past
This will soon be the past
You should know that
This will soon be the past
