

## Live in the Now

Goodbye June

The light flickers on  
Like the sparks in my mind  
I've been waiting so long  
To change my usage of time  
You know I need it

All my fears are too strong  
Have to keep my hands on what's mine  
Cause I need it  
Oh I need it

I've been walking ahead  
Always losing myself  
Replaying words that I've said  
From the past where I dwell

Got to find a way somehow to  
Live in the now  
Live in the now

Trade my blues for sunshine lately  
Live in the now  
Live in the now, baby

There's always peace to be found  
I'm tuning it out  
I'm turning it down  
To live in the now

The memory fields are all chaff  
It's time to burn them all  
Ain't no light in the past  
Just another black hole  
There's nothing left, honey

There's no future that lasts  
When you don't know the facts  
Or what you're living for  
Cause I need it, oh I need it

To love in the now  
This is the now
