

## Long Way

Gordi

Drag it from the inside like we're young again  
Tear up what they hoped was in their heads  
Cause I am watching you, you are looking at me  
And I am waiting for you

To say, just take a breath  
I know you'll get there  
We had such a long, long way to go  
You know you can be all that you want now  
I have such a long, long way to go

Open up with somebody who let you in  
Can it possibly be enough if you tell them where to begin?  
I know I'll owe nothing, but neither can survive  
So won't you keep me alive?

And say, just take a breath  
I know you'll get there  
We had such a long, long way to go  
You know you can be all that you want now  
I have such a long, long way to go

Does it feel to you like it felt before  
Like a triggers gone you don't know what for  
Like you lost control when you needed more  
Can you hear my voice in your bones again  
Can you be with me like you were back then  
I can handle this talk again

Oh say, just take a breath  
I know you'll get there  
We had such a long, long way to go  
You know you can be all that you want now  
I have such a long, long way to go  
Long, long way to go  
Long, long way to go  
Long, long way to go  
Just take a breath  
I know you'll get there  
We had such a long, long way to go
