

Don't Be Afraid

Gossip

Lately
I've been alone on my own
And thinking
Where times gone and how we've gone
And being some
You've met someone
And if that is true
I'm happy for you

I think that we should face it
You're so like me
To fake it til I make it
I couldn't be
More grateful for you
More grateful for you

Baby, don't be afraid
You never need to worry
The next time I'd see your face
Will be too soon
Ooh

Crazy, I didn't see
The trouble you would save me from myself
This thing that you have gave me
I never knew
I'm grateful for you
Grateful for you

It's amazing
I'm on the higher road
I'm on it morning and night
To be honest, baby
I couldn't mind
You just saved my life

Baby, don't be afraid
I don't live for living
The next time I'd see your face
Will be too soon
Ooh

You could say that the music lose me
But it's more like a place I've been before
If something so familiar

Hold me
Like you never ever have to hold someone
Like you [?] let go and so
Don't let go, don't let go

Can you hear me?
Tell me, is it coming through your listening?
Is this really something that is happening in my life?
Happening in my life

Never in my life

Never in my life
Could I say
I've felt this way, no
No, no
No, no
No
