

# Love Fall Foul

Gossling

You never kissed me the way you kissed her  
you never watched me like you watched her now  
You never wanted me like you want her on you  
You want her and you, I want you for me!

Chorus:

Time for love is surely now  
I want a partner, I want a lover  
Love come nearly, it's not for found  
I think I found love, I think I found you!

We have been made so long, it's past the time to say  
If you had known from the start  
I wonder if we could be lovers now instead of only friends  
I don't want just friends!  
You have to tell someone what's going on in your heart  
She turns to face you, and your eyes with hers don't part  
Oh, I think you'll marry her, you need her with you  
Always hurting you, now there's no room

Chorus:

Time for love is surely now  
I want a partner, I want a lover  
Love come nearly, it's not for found  
I think I found love, I think I found you!

Why do I make all my world about you  
This hurts the most because I'm the one to fall  
You never wanted me like I want you!
