

Mastodon

Gothminister

Dark and cold
Yet beautiful
Innocent
Digging in the mold
Will you sing for me
The most beautiful song on earth
As long as you sing it

Left alone
It's obvious
It did you no good
To be abandoned here
Will you sing for me
The most beautiful song I know
Before they take you

Feel the beast
Death is a relief
Meet your maker
Join the feast
Run faster in your dreams
This won't break you

We've got a freakshow here
Going somewhere
And we are on the road again
To bring you shock and horror

Dark and cold
So beautiful
Lost and found
You were on your own
Will you sing for me
The most beautiful song on earth
As long as you sing it

Face reflects
In the mirror water
You cast a hex
On the devil's daughter
Still I pray for you
The most vulnerable child on earth
And soon they'll take you

Feel the beast
Death is a relief
Meet your maker
Join the feast
Run faster in your dreams
This won't break you

We've got a freakshow here
Going somewhere
And we are on the road again
To bring you shock and horror

Dark and cold

Yet beautiful
Innocent
Digging in the mold
Will you sing for me
The most beautiful song on earth
As long as you sing it to me

We've got a freakshow here
Going somewhere
And we are on the road again
To bring you shock and horror
