

## Traveling Tune

Gov't Mule

Just another highway song, just another traveling tune  
They say sing about what you know

Well hello, people it's been a long time  
So good to see you, how ya' feeling?  
It's good to be together even for a short while  
Nothin' like a little rocking and reeling

So many familiar faces scattered in with the new ones  
We got to keep spreading the word  
You keep on comin', we'll keep on coming back  
Even when the lines are getting blurred

Just another highway song, just another traveling tune  
They say sing about what you know  
Well, I know I've been down this road a time or two  
So let's sing another road song before we go

Here's one for the fallen ones that didn't make it through  
This life's challenges and pressures  
We gotta keep on rising, keep singing in their honor  
Maybe even enjoy some of life's pleasures

Just another highway song, just another traveling tune  
They say sing about what you know

They say how many road songs can you write?  
As many as it takes to get it right  
Here's one I just wrote the other day  
Let's sing it then be on our way  
I try to inject myself into the show  
It's all I know

Well goodbye people, we'll see you down the road  
Some other time, some other place  
And we'll raise our voices, maybe even a glass in toast  
To those that can never be replaced

Just another highway song, just another traveling tune  
They say sing about what you know  
Well, I know this old heart's been broken a time or two  
So, let's sing another sad one before we go

Just another highway song, just another traveling tune  
They say sing about what you know
