

Which Way Do We Run?

Gov't Mule

Time fades slowly across the plains
Dreams so real - you can reach right out and touch them
Me - why'd you have to go and pick me
Do you know - do you even know can you tell me

Which way do we run
Which way do we run
Which way do we run

Think - Instincts tell you nothing now
The shadow of a giant can be felled by the shadow of a man
Demons stealing down from the heavens
Here comes one now - with a lightning bolt in his teeth

Which way do we run
Which way do we run
Which way do we run

I ain't gonna dream forever
But I'm gonna try and live
Tell me can you taste forever - right now Right now

Little Elvis Hitler don't'cha follow me
These scars on my back - they're because of you
And these cuts on my wrists
They're just me trying to get away from you
And I'm still trying to get away

Which way do we run
Which way do we run
Which way do we run
Which way do we run
Which way do we run
Which way do we run
