

Send Me Energy

Gowan

I don't need your sympathy
I don't need your remorse
I don't like your telling me
I'm running on the wrong course

Something you can't imitate
Something so precise
This is what I need from you
It's so very nice now

How come I'm always so tired
And you're so vital and wired

Don't waste my time being lazy
You got the one thing to save me, so save me

Send me energy
Then you don't have to worry what becomes of me

Entering a brand new phase
Make you feel real good now
Your vibration's positive
If you only would now
