

# Make You Mine

Grabbitz

I've seen and done it all before  
But when I touch you, I need more  
I breathe your air and make it mine  
It becomes a drug that gets me high, high

When the lightning strikes  
I need you more than the sky it lights  
For one more time, I would give my life  
Come on, baby, take it away, away  
And when the thunder hits  
It feels like every time I touch your lips  
You got me feeling like I don't exist  
Until I make you mine  
Until I make you mine

But when I smile, you make me cry  
It happens every fucking time  
And I feel like I'm stuck inside this game  
Nothing's changing, I still play, play

When the lightning strikes  
I need you more than the sky it lights  
For one more time, I would give my life  
Come on, baby, take it away, away  
And when the thunder hits  
It feels like every time I touch your lips  
You got me feeling like I don't exist  
Until I make you mine  
Until I make you mine
