

# Smokeclouds

Grace Gaustad

Adderall  
Mix it up with alcohol  
Syrup with your sprite  
If that's just what you like  
Sun is out  
By the time you're blacking out  
It's just another night  
I won't kill your vibe

Do you remember how you used to be  
Not much better than now  
But I'll keep that between us  
Let's keep this between us

In the smokeclouds  
Promise me when the sky gets dark  
You'll come down  
Hold my hand, we'll figure this out  
When the lines in the snow fade away  
I'll be here, when they're gone, you could stay  
In the smokeclouds with me

Yea I get  
It's something that's your momma did  
Your dad would never pay for it  
I guess he was right  
You can't go home  
Now that all your friends are gone  
A taste of something real  
So pop another pill

In the smokeclouds  
Promise me when the sky gets dark  
You'll come down  
Hold my hand, we'll figure this out  
When the lines in the snow fade away  
I'll be here, when they're gone, you could stay  
In the smokeclouds with me

Will you come back  
Will you come back  
Will you come back

I'll take you right back  
Take you right back  
Take you right back

Will you come back  
Will you come back  
Will you come back

I'll take you right back  
Take you right back  
Take you right back

In the smokeclouds  
Promise me when the sky gets dark

You'll come down  
Hold my hand, we'll figure this out  
When the lines in the snow fade away  
I'll be here, when they're gone, you could stay  
In the smokeclouds with me  
In the smokeclouds
