

# Before The Sky Falls

Grace Potter

On the night we met I got overcome  
Everything you said, everything you done  
The buildings and bridges are gonna turn to rust  
If only we could fall in love before the sky falls on us

I saw the lightning come just before the rain  
And I felt the knife before I felt the pain  
And I saw my city crumble into dust  
If only we could fall in love before the sky falls on us  
Before the sky falls on us

Let it fall down like a flag at a funeral  
Let us fall down into a place we've never been  
And now the walls are coming down  
And there's shaking in the ground  
If only we could fall in love

On the first warm day I wonder where you are  
A storm is coming but I just drive the car  
Four wheels spinning are gonna turn to rust  
If only we could fall in love before the sky falls on us  
Before the sky falls on us

Let it fall down like a flag at a funeral  
Let us fall down into a place we've never been  
And now the walls are coming down  
There's shaking in the ground  
If only we could fall in love  
Before the sky falls  
Before the sky falls on us  
Before the sky falls on us
