

The Good Just Gets Better

Grace VanderWaal

You think that you know everything to know about the world
But let me tell you now, you're just a little girl
There's much more to come, you can't give up now
College exams and high school boyfriends
Just getting by for the rest

So we'll take it one step at a time
Don't be nervous, you will be fine
We'll get through this together, you and me
So we'll take it one step at a time
Don't be nervous, you will be fine
We'll get through this together, you and me

Cause I believe you can
So please, just take my hand
And we will get through this together
Cause the good just gets better

Sure your rough days and your heartbreaks
But icecream is the best medicine for mistakes

So we'll take it one step at a time
Don't be nervous, you will be fine
We'll get through this together, you and me
So we'll take it one step at a time
Don't be nervous, you will be fine
We'll get through this together, you and me

Cause I believe you can
So please, just take my hand
And we will get through this life together
Because the good

So keep pushing through it, you can do it
We will find a way how
Hours into seconds, seconds
So please just make every one of them count

So we'll take it one step at a time
Don't be nervous, you will be fine
We'll get through this together, you and me
So we'll take it one step at a time
Don't be nervous, you will be fine
We'll get through this together, you and me

Cause I believe you can
So please, just take my hand
And we will get through this life together
Because the good just gets better
