

Life Out There

Grace

There's something in the garden
All the fruit is going rotten
And the flowers keep on dying
And the birds have gone all quiet

For a minute
It was over
Then I calmed down and found some composure
You wanna settle down
I'm not ready now
But I know that you're only getting older

Is there any sign of life out there?
Is there love beyond the world we share?
Is there any sign of life out there?
Out there (Oh-oh)
Is there any sign of life out there?
Is there love beyond the world we share?
Is there any sign of life out there?
Out there

I keep weighing all my options
Walk the line of almost walking
You say, "Lovers", I say, "Best friends"
I need all of it in one man

For a minute
It was over
Then I calmed down and found some composure
You wanna settle down
I'm not ready now
But I know that you're only getting older

Is there any sign of life out there?
Is there love beyond the world we share?
Is there any sign of life out there?
Out there (Oh-oh)
Is there any sign of life out there?
Is there love beyond the world we share?
Is there any sign of life out there?
Out there

We don't leave home
Wherever did the time go?
You make me feel old
I was full of fire and desire
Now it's trouble in paradise
Even when we don't fight
I almost wish we did
Do you remember that first time you were all over me?
Controlling every inch of my body
Nothing left to prove now you got me
Do you see it though?
When you touch me is it visual?
What we here for?
