

Make It Better

Grady

I slowed down
I picked up weights and put my phone down
The only place I want to go now
Is deeper into my self

The ripples turned to waves
And hit the coast like an avalanche
I watched the gold slipping through my hands
And learned that if there's a master plan

Then it's up to me to decide
That I'm totally free, it's my life
And if there's some things I don't like
I can make it better, better

I'm here now, sorry for the wait
I can drown, or I can levitate
If I find some things that I hate
I can make it better, better

I've got an angel on my back
Rubbing my blades, cutting all of my stress
Teaching me patience, slowing my breath
Reminding me things that I always forget

We don't need much
But I'm not complaining about the nice place
Or the big Mercedes in the driveway
They're just things, real joy is all inside me

I know that it's up to me to decide
That I'm totally free, it's my life
And if there's some things I don't like
I can make it better, better

I'm here now, sorry for the wait
I can drown, or I can levitate
If I find some things that I hate
I can make it better, better
