

More More More

Grady

The year is closing up
There's still so much that I wish that I had done
I'm sitting on my perch in the sun and I'm counting down the days
I fell in and out of love
But I'm blessed that we still get to keep in touch
Sienna moved a few corners down and we talk most every day

Cherry
She wrapped me in her arm said "I'm all yours"
Cherry
I really had it all but wanted more more more

And I've seen Jade a couple times
Out at parties but we just wave with our eyes
It's awkward but I guess it's expected when you waste a good girl's time
And now all of those wrongs have been turned into songs
And best friends turned into enemies
She always saw the best in me, hey
And I still think about her most every day

Cherry
I hope you found what we were looking for
Cherry
I really had it all but I wanted more more more
