

u n me

Grady

You're making sense in the ways that I always knew
I wanted but thought were all fake
I'm never bored
When you're here I'm entertained by your presence
And the faces that you make
I feel sure, more sure than anything
This is everything
I just need a wedding ring
Let's go explore
Meet me anywhere, I don't really care

As long as it's you and me
We could walk along the water with no shoes on our feet
If it's you and me
I could run around world with everything I'd ever need
In the palm of my hand cause I got you
We could do anything we want to
With just you and me
I could run around the world with everything I'd ever need

It's a wave
It's a wavy wave
An excursion to the deep end
You know me
You know certainty is an illusion
Yeah it's true
I feel it here paradoxically
It's a mess and it's the best
Never ending
In simplicity, we don't have to be in a concept baby

We both want something that's mystical
Wanna find something wild and free
With you it really isn't so difficult

Nothing really is when it's with you and me
We could walk along the water with no shoes on our feet
If it's you and me
I could run around world with everything I'd ever need
In the palm of my hand cause I got you
We could do anything we want to
With just you and me
I could run around the world with everything I'd ever need
