Let It Go

Graham Colton

Where there's love there is pain
With the sun comes the rain
Without wrong there'd be no right
Every day begins with night
In a crowd or all alone
Said out loud on telephones
When you give me your hand
With no words I understand

You got no one to run to
You got no one to find you

Stars will explode
Mountains erode
Oceans over flow
Let it go
Now yesterday is too far away
It's the end of the road
Let it go

I found love when there was pain
I felt the sun in pouring rain
I wish all my wrongs I could do right
I wish that you were hear tonight

Stars will explode
Mountains erode
Oceans over flow
Let it go
Now yesterday is too far away
It's the end of the road
Let it go
