

Start Somewhere

Graham Colton

Lets waste time falling in love
And take everything as it comes
If I could rush you away
Lets find our own secret place

I don't want to wait
I know it wouldn't take to long

So all that I need is you next to me
We don't have to leave to go there
We'll find a way as long as we start somewhere

If I said I've got a plan
And all I need is your hand
We could leave this busy life
And take everything in stride

I don't want to wait
I know it wouldn't take to long

So all that I need is you next to me
We don't have to leave to go there
We'll find a way as long as we start somewhere

I don't want to wait
I know it wouldn't take to long

All that I need if you next to me,
We don't have to leave to go there
If we get lost the bridges we cross
Are broken and lead to nowhere

So all that I need is you next to me
We don't have to leave to go there
We'll find a way as long as we start somewhere

If we start somewhere
Lets waste time falling in love
