

Never Been

Granger Smith

Got me feeling top of the mountain mile high city
Soakin' up the glow of your small town pretty
Takin' up the sights, breathin' it in
Taking me places that I've never been

Got the gold coast eyes girl bluer than the water
And a farm town boy still wondering how he got her
The Tennessee sun down on your skin
You're taking me places that I've never been, I've never been

I can go round and round this town all night
Circling forever while I hold you tight
The first time feeling girl it don't end
Keep taking me places that I've never been
Taking me places that I've never been

I can tell you right now I don't really care if
I never see the pretty little lights in Paris
My picture perfect world wide view
Is right here looking at you

I can go round and round this town all night
Circling forever while I hold you tight
The first time feeling girl it don't end
Keep taking me places that I've never been
Taking me places that I've never been

Half a carrot diamond in a platinum band
I hope you let me slip onto your left hand
I never knew before what true love meant
But you're taking me places that I've never been
I've never been, yeah

I can go round and round this town all night
Circling forever while I hold you tight
The first time feeling girl it don't end
Keep taking me places that I've never been
Taking me places that I've never been

We can go round and round this town all night
We can go round and round this town all night
Taking me places that I've never been
